Biopsy Device for **Uroteck®** Core Biopsy Needles

- This reusable double-action biopsy device is designed to work with Uroteck® core biopsy needles (UTN series) for taking biopsies in soft tissue such as the prostate and breast
- A handle stop allows the device sample notch of the core biopsy needle to be exposed so that the core sample may be removed without taking the needle out of the device.
- The device is available in stroke lengths of 23mm, 16mm and 12mm.

Part No	Description	Color	Qty/ Cs
UTBD-MD12	Double-action biopsy device w/ 12mm Stroke	Grey	1
UTBD-MD16	Double-action biopsy device w/ 16mm Stroke	Grey	1
UTBD-MD23	Double-action biopsy device w/ 23mm Stroke	Grey	1
